Sheridan College Institute	\$250,910.24
Oshawa Community Health Centre	\$248,480.31
Gateway Community Health Centre	\$248,459.1

Objective of My Visualization

With my visualization, I was looking to see what sector was the best to work in based on the average salary of a person working in the sector. This is because a sector with a higher average salary would mean a person will most likely get a higher paying job if they choose to work in that sector (assuming they have the appropriate qualifications). This can be useful information in choosing a career path, university program or specific job to apply for – assuming money is an important factor in this decision.
